

MB CAMPUS (MERCEDES-BENZ)

Dunwoody College's MB Campus training is an online, add-on credential for students enrolled in any of the College's automotive service degree programs. The program is specifically intended for students who are already working or would like to work at a Mercedes Benz facility and is sponsored by Sears Imports.

During the program, students will study Mercedes information systems and various maintenance procedures. They will also gain knowledge of engine, transmission, chassis/brake, electronic, and basic electricity fundamentals.

Students complete Mercedes online training modules in their second semester as an elective. Training progress is monitored by the Dunwoody MB Campus coordinator. Modules must be regularly completed to remain active in the training.

Training credentials come directly from Mercedes, preparing students for employment at any Mercedes dealership nationwide. Students who complete the training are also prepared for additional training while employed at a Mercedes facility.

REQUIRED COURSES
