

DUNWOODY  
COLLEGE OF TECHNOLOGY

*Building stronger communities  
together by bridging the gaps  
that divide us.*

A CASE FOR SUPPORT

# FOR *all* TIME

## Facilities to Support Hands-On Education

### **Imagine a Hallmark Campus as the Doorway to Minneapolis**

The investment in Dunwoody's facilities will support enrollment growth and provide the spaces and places that enhance student success as the College reaches out to serve more women and more students and color. This will allow the College to provide educational pathways to the middle class, build stronger communities, and support industry's needs for more talent to drive the economy.

The need to support more students to meet industry's demand for skilled workers in STEM fields, along with Dunwoody's goals to attract and serve an increasingly diverse student body drove leadership to conduct a comprehensive campus master plan.

The master plan provides a framework for creating a physical space that is commensurate with Dunwoody's reputation as a leader in technical education.

Founded in 1914, the main Dunwoody campus building was originally built in 1917. Designed to provide the spaces needed to educate future workers in the skilled trades, including automotive, machine tool, and construction, the building has been renovated over time as academic and student needs have changed.

The master plan identifies a phased approach for continuing to adapt Dunwoody's dynamic learning and student-centric spaces to accommodate for current and future needs. These needed changes will create an integrated and welcoming campus experience, both internally and to the exterior campus environment.

Supporters who invest in our academic and student-support facilities are helping Dunwoody continue to attract the region's top talent, by creating a learning environment that inspires creativity, promotes collaboration, and encourages engagement.

**VISION 2026**

Provide industry-driven, hands-on education that changes students' lives and solves the skills gap — to anyone, anywhere, at anytime.

# A Phased Approach to Transforming the Campus

The College created a long-term, three-phased approach to renovating the campus.

The plan includes new classrooms, collaborative learning, study, and office spaces, as well as new spaces for student life and student success programs and initiatives.

## PHASE ONE

Build Dunwoody’s capacity to educate the next generation of skilled technicians by expanding and improving the functionality of our physical spaces. Create new and innovative labs, shops, and studio spaces that mirror the working world.

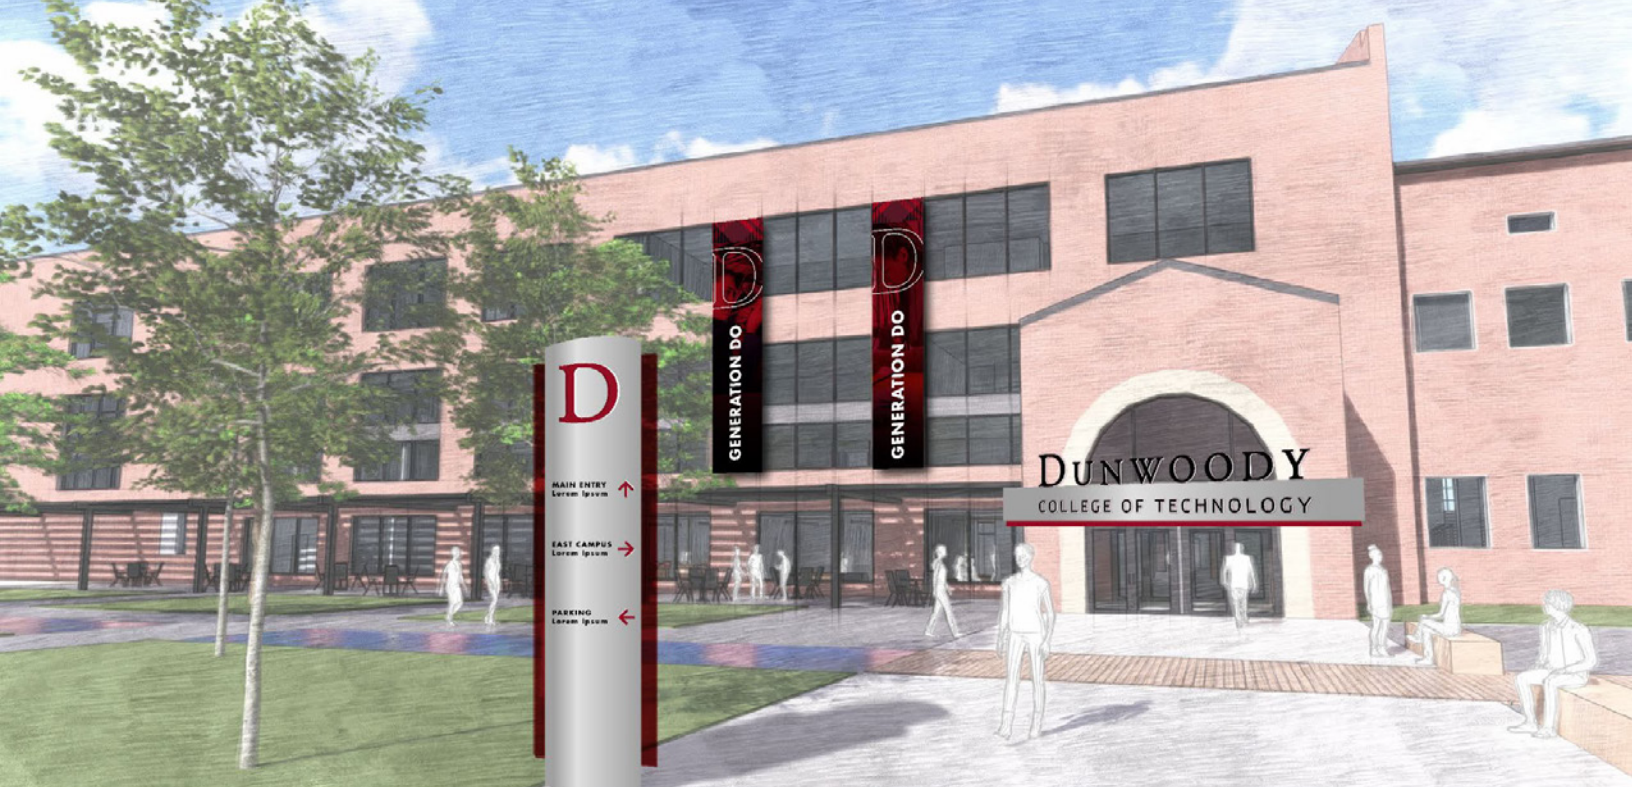

## PHASE TWO

Create a comprehensive campus environment with the addition of a new Student Services Center and welcoming main entrance, as well as enhanced green space and curb appeal.

## PHASE THREE

Complete the transformation of the Dunwoody campus, making it the gateway to the Minneapolis community and a beacon of hope for the people of our state.

## A WELCOMING WEST ENTRANCE

Restoration of Dunwoody's exterior facade including window replacement, along with additional green space and welcome signage will create a revitalized West Entrance to the Dunwoody campus.

## A NEW STUDENT SERVICES CENTER

Reconfiguring Dunwoody's current Pinska Center to create a more welcoming and open space for departments and offices that support students at the College.

## Naming Opportunities

Dunwoody College of Technology welcomes the opportunity to honor those who have rendered extraordinary support to the College. The named gift program offers donors opportunities to establish recognition to persons, families, or corporations in exchange for major gifts to the College. Naming opportunities are available for all phases of the comprehensive master plan.

A private, non-profit College, Dunwoody is grateful for everyone who chooses to support our mission of changing lives. Each year, financial support impacts hundreds of students and staff by providing tuition assistance, scholarship support, funding equipment, and other classroom resources. Big or small, these gifts are vital to keeping Dunwoody strong and helping educate our future leaders.

Dunwoody College of Technology accepts gifts of cash, securities, and planned gifts. Each giving option has its own tax and financial implications and advantages.
